

SANDUN WIRATUNGA

B.Sc. (Hons) in Software Engineering

sandun.wira@outlook.com

Ambitious individual with strong organizational and multitasking skills, as well as an aptitude for technology. Ready to apply knowledge and skills to any challenge. Seeking to utilize excellent communication, interpersonal, and organizational skills to complete tasks. Reliable with a good work ethic and the ability to quickly adapt to new tasks and environments

EDUCATION

- **2021 - 2025**
B.Sc. (Hons) in Software Engineering
University of Plymouth, United Kingdom
Completed a Bachelor's degree with Second Class Honours (Upper Division), covering algorithms, system design, and programming fundamentals within Software Engineering. I was involved in hands-on projects and collaborative tech clubs that sharpened my practical skills, and I actively engaged in research and innovative initiatives to stay prepared for emerging technology trends.
- **June 2020**
Graphic Designing Course
ATARI Institute, Colombo 08, Sri Lanka
Completed a course covering design fundamentals, color theory, and layout aesthetics. Gained proficiency in industry-standard tools like Adobe Photoshop and Illustrator. Developed a diversified portfolio showcasing creative and technical design skills.
- **January 2020**
Course in Spoken English
British Council, Colombo 03, Sri Lanka
Refined oral communication, pronunciation, and public speaking techniques. Enhanced listening skills and professional language fluency through interactive sessions. Built confidence for effective interpersonal and client communications.
- **2009 - 2020**
School
St. Joseph's College, Colombo 10, Sri Lanka
Established a solid academic foundation through a diverse curriculum and rigorous study. Actively participated in extracurricular activities, including sports and debate clubs, fostering leadership. Recognized for academic excellence and a well-rounded character through community involvement.

WORK EXPERIENCE

- **Jan 2024 - August 2024**

Junior Graphic Designer (Part-Time)

Dilshan Drapers (Pvt) Ltd, Nawala, Rajagiriya, Sri Lanka

Assisted in the creation of visually compelling marketing materials, including social media posts, banners, and promotional content to enhance brand presence. Captured and produced high-quality photography and videography for product showcases, ensuring engaging visual storytelling. Edited photos and videos using Adobe Photoshop and Adobe Illustrator, maintaining professional aesthetics across digital and print platforms. Collaborated with the marketing team to align designs with branding strategies, improving audience engagement and outreach.

PROJECTS

TOP ACADEMIC PROJECTS

- **Nova - AI Assistant developed for Windows 10 operating system**

Nova is a personal AI assistant designed specifically for Windows 10, aiming to fill the gap left by Cortana's discontinuation by offering advanced natural language and voice command interaction, contextual awareness, and personalized user experiences.

- Tools and Skills: Tauri, Rust, Cargo, Node.js, npm, HTML, CSS, JavaScript, JSON, Figma, GitHub

- **FurnitureViz - Web application for a furniture visualization platform**

FurnitureViz is a web-based application that enables users, especially furniture store designers, to create and visualize personalized room layouts using interactive 2D and 3D models. The platform features drag-and-drop furniture placement, real-time editing, color and material customization, and the ability to save and share designs.

- Tools and Skills: Node.js, npm, Supabase, React, Tailwind, Three.js, GitHub

- **FlavourDash - Web application for a restaurant/takeaway ordering system**

FlavourDash is a comprehensive restaurant and takeaway ordering system built on the MERN stack, offering customers an intuitive platform to browse menus, place orders, and track deliveries in real time. It features inventory administration, order tracking, secure payment processing, and customer engagement features like reviews and notifications.

- Tools and Skills: Node.js, npm, MongoDB, Express.js, React, Tailwind, JWT, JSON API, GitHub

- **TheGreenPerch - Web application for finding accommodations near NSBM Green University**

TheGreenPerch helps NSBM Green University students find accommodations by connecting with landlords. It supports property listings, approvals, and reservations. Features include map integration, secure registration, and direct communication, ensuring a seamless experience.

- Tools and Skills: PHP, Apache Tomcat, HTML, CSS, JavaScript, Google Maps API, JSON API, MySQL, GitHub, Figma

- **Synthia - Web application for developing mindfulness and mental health**

Synthia is a multifunctional project with an AI chatbot and a comprehensive website. It offers intelligent conversations, content creation, and productivity tools. A key focus is mental health awareness, providing self-help resources and wellness tips. Users can access supportive conversations to promote emotional well-being.

- Tools and Skills: Node.js, Express.js, npm, HTML, CSS, JavaScript, JSON API, SQLite, GitHub, Figma

- **GREEN - E-commerce web application for a supermarket**

GREEN is an advanced e-commerce website for a supermarket, offering a user-friendly shopping experience. Customers can browse products, manage wishlists and carts, and make secure payments via PayPal. Features include product search, top deals, personalized recommendations, and order tracking.

- Tools and Skills: Java with Maven, XAMPP, Apache Tomcat, JSP, HTML, CSS, JavaScript, PayPal API, MySQL, GitHub, Figma

- **Koo-Lo.com - Fashion E-Commerce web application with price comparison**

Koo-lo.com is a comprehensive fashion e-commerce website focused on price comparisons of fashion products to users, featuring a wide range of clothing and accessories for both men and women, with high-quality visuals, optimized SEO, and clear categorization to enhance the shopping experience.

- Tools and Skills: PHP, Node.js, Express.js, npm, HTML, CSS, JavaScript, JSON API, MySQL, GitHub, Replit, Figma

TOP SELF-DEVELOPED PROJECTS

- **Shortify - Web application for shorten longer URLs**

Shortify is a modern URL shortening service that transforms long, unwieldy links into clean, memorable URLs in seconds. The platform offers instant URL shortening without requiring registration, provides permanent links that never expire, and includes built-in analytics to track click performance.

- **Tools and Skills:** Node.js, npm, React, Tailwind, Supabase, Tabler Icons, GitHub, Adobe Photoshop, Make.com, Google AdSense, Google Analytics, Google Search Console, Bing Webmaster Tools

- **PixelGamez - Web-based online gaming platform**

PixelGamez is an online gaming platform offering a variety of single-player and multiplayer games. Users can play many games instantly without needing to log in. For a more personalized experience, creating an account allows for score tracking and competition. The platform aims to provide a fun, accessible gaming experience with no downloads required.

- **Tools and Skills:** Node.js, npm, React, Tailwind, Supabase, Tabler Icons, GitHub, Adobe Photoshop

- **Primeline.lk - Web application for Primeline Solutions (Pvt) Ltd**

Primeline.lk is the website for Primeline Solutions (Pvt) Ltd, a Sri Lankan company offering services such as industrial printing, civil construction, and industrial HVAC services. The site also provides company information, blogs, and contact details.

- **Tools and Skills:** Node.js, npm, React, Tailwind, Firebase, Google Analytics, Google Search Console, Bing Webmaster Tools, GitHub, Adobe Photoshop, Figma

- **Fixumo - Web application for a PC repairing company**

Fixumo is a website for a PC repair company, advertising services in Brisbane and offering tech tips via its blog. It features responsive navigation, service details, an interactive location map, and contact information. The content includes a homepage, a blog index, and articles on PC maintenance.

- **Tools and Skills:** HTML, CSS, JavaScript, Google Maps API, GitHub

- **Chroma - Windows tool to manage Chromium browser installation**

Chroma is a simple Windows tool that makes it easy to handle the Chromium web browser. It lets you install, update, and remove Chromium without any issue. The main goal is to give a smooth and straightforward way to manage the Chromium browser.

- **Tools and Skills:** Node.js, npm, HTML, CSS, JavaScript, Tauri, Rust, Cargo, GitHub, Adobe Photoshop, Adobe Illustrator

- **PixelPlayer - Windows application for emulating old flash games**

PixelPlayer is a desktop application built with Tauri and Ruffle, designed to revive and play old Flash games. Its main objective is to provide a platform for users to enjoy these classic games locally. It aims to preserve the experience of Flash gaming.

- **Tools and Skills:** Node.js, npm, HTML, CSS, JavaScript, Ruffle, Tauri, Rust, Cargo, GitHub, Adobe Photoshop, Adobe Illustrator

- **Aurora - Windows application for Aurora AI chatbot**

Aurora is a desktop AI chatbot application built using Tauri and Rasa, designed to provide a conversational AI experience. The project aims to deliver a responsive and user-friendly chatbot experience on the desktop, with custom styling and window management.

- **Tools and Skills:** Tauri, Rust, Cargo, npm, HTML, CSS, JavaScript, JSON, Rasa, Docker, Microsoft Azure

- **PassForge - Windows application for generating secure passwords**

PassForge is a Windows application designed to generate secure passwords. Its main features include customizable password generation based on strength, inclusion of symbols, and length, along with a simple interface for copying the generated password. The project aims to provide an open-source, user-friendly utility for enhancing password security.

- **Tools and Skills:** Tauri, Rust, Cargo, HTML, CSS, JavaScript, Figma

- **Syndate - UI design for a modern dating application**

Syndate is a sleek and modern mobile dating app UI that emphasizes intuitive navigation and user-friendly interactions. The design features streamlined onboarding, engaging profile browsing, and seamless chat functionality, all enhanced by a cohesive color scheme and clean typography.

- **Tools and Skills:** Figma, Adobe Photoshop, Adobe Illustrator
